DETAILED ACTION

Drawings

1. The drawings (Fig. 6) are objected to because "127" in Eq. 5 should be -- 121 --. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities:

a/ on pages 1 and 33, in the title "WHICH WHICH" should be -- WHICH --.

b/ on page 1, line 10, "___" should be -- 16 --. Furthermore, Applicants are reminded to provide the Serial No. of the related application (i.e., 10/759,910).

Art Unit: 2829

c/ on page 15, line 27, "22" should be -- 28 --.

d/ on page 19, line 13, "fifty" should be -- fifty five --.

Appropriate correction is required.

3. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

4. Claims 1 and 2 are objected to because of the following informalities: "thru" (lines 7 and 3, respectively) should be -- through --.

Appropriate correction is required.

Conclusion

5. This application is in condition for allowance except for the following formal matters: the objections to the drawing, the specification, and the claims set forth above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

6. The following is a statement of reasons for the indication of allowable subject matter:

Claims 1-12 recite, inter alia, a circuit, for use in testing and IC-module; said circuit comprising a single transistor having a current channel which is coupled in series

Art Unit: 2829

with a first resistor between a source voltage terminal and an output terminal; said single transistor also having a control lead, for enabling and disabling the flow of current through said current channel, which receives an input test signal; a second resistor which couples said output terminal to a reference voltage terminal.

The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include the above limitations.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Weller et al. 6,373,260 Single Cable, Single Point, Stimulus And Response Probing System And Method.

Ohno 6,147,549 Reference Voltage Generating Circuit Of Generating A Plurality Of Reference Voltages.
